

## F200 Steel Case Padlock

F200 padlocks are precision CNC'd for quality and dependability and work with 5, 6 and 7 pin SFIC Interchangeable core.

F200 padlocks are manufactured from steel that is hardened and then nickel-plated for extreme toughness and resistance to the elements.

Each padlock features a non-key retaining brass actuator and dual locking stainless steel ball bearings. This design significantly reduces the ability for the padlock to be shimmed and pulled.

Product Number	Body Type	Description/Specification	Shackle Dimensions		
			(A)	(B)	(C)
F200	Hardened Steel	2" Wide Hardened Steel Padlock	3/8"	1-3/16", 2", or 3"	25/32"

### Standard Features:

- U.S. made with global components
- Three shackle lengths available
- Solid Brass Actuator
- Dual Stainless Steel Ball Bearings

	Model	Cylinder Type	Shackle Length	
How To Order	F200	IC (SFIC Interchangeable Core)	B	1 3/16"
			D	2"
			E	3"
